DETAILED ACTION

Restriction / Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 22, drawn to a process for preparing a polymerizable composition, classified in class 526, subclass 318.
 - II. Claim 21, drawn to an ocular device, classified in class 623, subclass 4.1+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product, such as a device that is not used for ocular device application.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1713

4. A telephone call was made to Thomas J. Kowalski (Reg. No. 32,147) on November 28, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made. Further, on December 2, 2005, applicants' representative requests a written restriction to be issued.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
